-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Objections*

1. **Claim 6** is objected to under 37 CFR 1.75 as being a substantial duplicate of the language "*an output request ... the device ID.*" as recited in lines 5-7 of **claim 5**.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 1, 4-6, 13-14 and 16-18** are rejected under 35 U.S.C. 102(b) as being anticipated by Kohno (US # 6,473,191).

With respect to **claims 1, 14, 16**, Kohno teach a printer (101) comprising a print performing unit (inherent feature in the printer) which can change a cartridge or a structure thereof (col. 3, lines 19-23) and in which contents of an executable printing process change depending on the structure (col. 5), an apparatus name information storing unit (106) which stores a plurality of apparatus name information as identification information of the apparatus coordinated with the structure, and a request responding unit (105) for transmitting the apparatus name information coordinated with the structure at that time when a prescribed request is received among the plurality of apparatus name information to an apparatus transmitting the request (see cols. 2-6 of Kohno).

With respect to **claims 4 and 17**, Kohno teach a printer (101) comprising a print performing unit (inherent feature in the printer) which can change a cartridge or a structure thereof (col. 3, lines 19-23) and operates in either a state capable of a color printing or a state capable of only a monochromatic printing in accordance with the structure (cols. 4-5); and an output request responding unit (105) for transmitting a printer name corresponding to the operating state of the print performing unit to an apparatus outputting an output request when the output request responding unit receives the output request of the printer name (see cols. 2-6 of Kohno)

With respect to **claims 5, 6 and 18**, Kohno teach a printer (101) comprising a print performing unit (inherent feature in the printer) which can change a cartridge or a structure thereof (col. 3, lines 19-23) and operates in either a state capable of a color printing or a state capable of only a monochromatic printing in accordance with the structure (cols. 4-5); and an output request responding unit (105) for transmitting a model type or a device ID corresponding to the operating state of the print performing unit (col. 4) to an apparatus outputting an output request when the output request responding unit receives the output request of the device ID (see cols. 2-6 of Kohno)

With respect to **claim 13**, see col. 4, lines 43+ teaches only the model type of the printing apparatus or only the apparatus name information among the plurality of apparatus name information coordinates with the mounted cartridge or the structure.

***Allowable Subject Matter***

4. **Claims 2 and 3** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter:

**Claims 2 and 3** have been indicated for containing allowable subject matter because the prior art fails to teach the entire combination of a printer including a rewriteable storing unit which stores a machine type designating value as information for designating any of the apparatus name information stored in the apparatus name information storing unit, wherein the request responding unit transmits the information designated from the plurality of apparatus name information by the machine type designating value stored in the rewriteable storing unit to the apparatus which transmits the request when the request responding unit receives the prescribed request.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh H. Chau whose telephone number is (571) 272-2156. The examiner can normally be reached on M - TH 9:30AM - 8:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew H. Hirshfeld can be reached on (571) 272-2168. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
